POLYMER SYSTEMS

IPS 500MAX

Introducing IPS 500MAX, a versatile two-component, one to one by volume spray-applied polyurethane foam insulation. IPS 500MAX is engineered as a MAX-yield, low-density solution suitable for a wide temperature range and adaptable to various climate conditions. This is our highest yielding .48pcf formulation to date, while still delivering an environmentally conscious insulation product containing no ozone-depleting blowing agents and relies on 100% water. It is specifically designed to excel in thermal performance and provides effective control of air infiltration as an air-barrier assembly. IPS 500MAX consistently delivers high-quality performance, reducing downtime and enhancing on-site efficiency, creating an innovative insulation solution for all your needs.

SOUND INSULATION

Open-cell spray foam excels in sound dampening, absorbing and minimizing noise to create a quieter and more comfortable indoor environment.

Proven Technology

Spray foam was developed in the late 1930's and was used commercially in the 1940's with exponential growth thereafter.

INSULATION THAT PAYS FOR ITSELF

Spray foam insulation pays for itself over time by significantly reducing energy costs through its superior insulation properties, resulting in lower utility bills and creating a more energy-efficient and cost-effective home or building.

Long-lasting

Spray foam insulation boasts exceptional durability, ensuring a long-lasting and effective solution for maintaining energy efficiency in buildings.
