

THERMA - LOK™ | 500EZ

Introducing IPS 500EZ, a versatile two-component, one to one by volume spray-applied polyurethane foam insulation. IPS 500EZ is engineered as a high-yield, low-density solution, boasting a hassle-free, no-mix application process suitable for a wide temperature range and adaptable to various climate conditions. This environmentally conscious insulation product contains no ozone-depleting blowing agents and relies on 100% water. It is specifically designed to excel in thermal performance and provides effective control of air infiltration as an air-barrier assembly. IPS 500EZ consistently delivers high-quality performance, reducing downtime and enhancing on-site efficiency creating an innovative insulation solution for all your needs.

DEFINING EXCELLENCE THROUGH INNOVATION

SOUND INSULATION

Open-cell spray foam excels in sound dampening, absorbing and minimizing noise to create a quieter and more comfortable indoor environment.

INSULATION THAT PAYS

Spray foam insulation pays for itself over time by significantly reducing energy costs through its superior insulation properties, resulting in lower utility bills and creating a more energy-efficient and cost-effective home or building.

PROVEN TECHNOLOGY

Spray foam was developed in the late 1930's and was used commercially in the 1940's with exponential growth thereafter.

LONG LASTING

Spray foam insulation boasts exceptional durability, ensuring a long-lasting and effective solution for maintaining energy efficiency in buildings.
