

# THERMA - LOK™ | 500MAX

Introducing IPS 500MAX, a versatile two-component, one to one by volume spray-applied polyurethane foam insulation. IPS 500MAX is engineered as a MAX-yield, low-density solution suitable for a wide temperature range and adaptable to various climate conditions. This is our highest yielding .48pcf formulation to date, while still delivering an environmentally conscious insulation product containing no ozone-depleting blowing agents and relies on 100% water. It is specifically designed to excel in thermal performance and provides effective control of air infiltration as an air-barrier assembly. IPS 500MAX consistently delivers high-quality performance, reducing downtime and enhancing on-site efficiency, creating an innovative insulation solution for all your needs.

DEFINING EXCELLENCE THROUGH INNOVATION

## SOUND INSULATION

Open-cell spray foam excels in sound dampening, absorbing and minimizing noise to create a quieter and more comfortable indoor environment.

## INSULATION THAT PAYS

Spray foam insulation pays for itself over time by significantly reducing energy costs through its superior insulation properties, resulting in lower utility bills and creating a more energy-efficient and cost-effective home or building.

## PROVEN TECHNOLOGY

Spray foam was developed in the late 1930's and was used commercially in the 1940's with exponential growth thereafter.

## LONG LASTING

Spray foam insulation boasts exceptional durability, ensuring a long-lasting and effective solution for maintaining energy efficiency in buildings.
